## Research Interests

I am motivated by topics at the interface of mathematics and theoretical computer science. My main interest is computational topology, which is a field in between low-dimensional topology and algorithms. My goal is to investigate the rich relationships between manifolds, knots, surfaces, and graphs from a computational perspective.

## Employment and Education

<b>2025-2026</b>	<i>Charles University, Prague</i> : Post-doc in collaboration with Martin Tancer.
<b>2024-2025</b>	<i>INRIA UCA</i> : Post-doc in collaboration with Clément Maria within the Datashape team.
<b>2021-2024</b>	<i>LIGM, Université Gustave Eiffel</i> : PhD thesis: "Trees, Decompositions, and Knot Theory" under the supervision of Arnaud de Mesmay and Pierre Dehornoy. PhD defended on the 23rd of September 2024. <ul style="list-style-type: none"><li>• Reviewers:<ul style="list-style-type: none"><li>- David Eppstein, University of California</li><li>- Stephan Tillmann, University of Sydney</li></ul></li><li>• Examiners:<ul style="list-style-type: none"><li>- Dominique Attali, Gipsa-lab</li><li>- Livio Liechti, Université de Fribourg</li><li>- Delphine Moussard, Aix-Marseille Université</li><li>- Lionel Pournin, Université Sorbonne Paris Nord</li></ul></li></ul>
<b>2017-2021</b>	<i>École Normale Supérieure de Lyon</i> , scholarship at ENSL: 2020-2021 ENSL M2 of theoretical computer science. Internship with Arnaud de Mesmay at <i>LIGM</i> : "From decomposing graphs to sweeping knots".
2019-2020	ENSL M1 of Mathematics. Internship with Olga Kravchenko at <i>Université Lyon 1</i> : "Le polynôme d'Alexander vu par les graphes bipartis".
2018-2019	ENSL M1 of theoretical computer science. Internship with Uli Wagner at <i>Institute of Science and Technology Austria</i> : "Expander graphs and high dimensional Expanders".
2017-2018	ENSL L3 of theoretical computer science. Internship with Arnaud de Mesmay at <i>Gipsa-lab</i> : "Réduction monotone de noeuds".
<b>2014-2017</b>	<i>Toulouse</i> , Higher school preparatory classes at Lycée Pierre de Fermat

## Awards

- 2025** Laureate of thesis prize Prix solennel de thèse 2025 from the Chancellerie des Universités de Paris in the general science category.
- 2022** Best PhD student talk at ED MSTIC day.
- 2017** Junior Fermat prize for mathematical research.

## Publications

In theoretical computer science, articles are frequently published twice, first in a conference with peer-reviewed proceedings and subsequently in a journal. Even if a paper appears in more than one form, it is only listed once in the following lists. In my field, writers are ordered alphabetically.

### Articles in conferences

1. *Hard Diagrams of Split Links*, with Arnaud de Mesmay and Jonathan Spreer, accepted in the 41th Symposium on Computational Geometry (SoCG 2025, invited to DCG and JoCG special issues on SoCG 2025), 2025.  
<https://arxiv.org/abs/2412.03372>.
2. *Hopf Arborescent Links, Minor Theory, and Decidability of the Genus Defect*, with Pierre Dehornoy and Arnaud de Mesmay, Proceedings of the 40th Symposium on Computational Geometry, 2024.  
<https://arxiv.org/abs/2312.09094>.  
A journal version has been accepted to the DCG special issue on SoCG 2024.
3. *A Structural Approach to Tree Decompositions of Knots and Spatial Graphs*, with Arnaud de Mesmay, Proceedings of the 39th Symposium on Computational Geometry (SoCG 2023), 2023.  
<https://arxiv.org/abs/2303.07982>.  
A journal version has been accepted in Algebraic & Geometric Topology.

### Articles in journals

4. *Etude d'un invariant des noeuds alternés et mise en oeuvre informatique*, in French, with Hugo Fages and Quentin Rembert, Quadrature 112 (2019) p23-31.

## Presentations

- Seminaire Rauzy, Marseille, France, 2025.
- Seminaire MC2, Lyon, France, 2025.
- Seminaire AlGCo, Montpellier, France, 2024.
- AATRN Seminar (online), November 2024.
- Geometry & Computing (poster), Marseille, France, 2024.
- International symposium of Computational Geometry, Athens, Greece, 2024.
- Journées du GdR IFM (poster), Grenoble, France, 2024.
- Journées Graphes et Algorithmes, Lyon, France, 2023.

- International symposium of Computational Geometry, Dallas, Texas, USA, 2023.
- SOS Workshop, Dagstuhl, Germany, 2023.
- ED MSTIC PhD Student day, best presentation, Paris, 2022.
- Journée de Géométrie Algorithmique (online), 2022.
- AMS-EMS-SMF Joint Congress of Mathematics, Grenoble, France, 2022.

## Teaching

<b>2022-2024</b>	Algorithms course, exercise and practical sessions, 48 hours, ESIPE, first year.
<b>2021-2023</b>	Algorithms and tree data structures, exercise sessions, 22 hours, L2 course at Université Gustave Eiffel.
<b>2021-2022</b>	Lab math-info, exercise and practical sessions, 40 hours, L2 course at Université Gustave Eiffel.

## Reviews

I reviewed several papers, they were coming from SoCG 2023, FWCG 2025, and Experimental Mathematics.

## Skills

Spoken languages	Programming languages
<ul style="list-style-type: none"> <li>• French, native speaker.</li> <li>• English, fluent (Certificate in Advanced English, C1).</li> <li>• German, school level (B1).</li> </ul>	<ul style="list-style-type: none"> <li>• C</li> <li>• Python</li> <li>• OCaml</li> <li>• LaTeX</li> </ul>
